SUMMARY

IT Executive with hands-on experience in IT support, Windows systems, hardware, software, and network troubleshooting. Skilled in IT asset management, vendor coordination, automation, and resolving technical issues to support smooth daily operations.

EDUCATION

BSc. Information Technology (Hons) **Oct 2022 - Apr 2026**
Universiti Utara Malaysia

- Major in Software Engineering.
- Current CGPA: 3.79
- Dean's List: 5 semesters (For CGPA above 3.67)

Pre-University **Jul 2021 - Jul 2022**
Kolej Matrikulasi Pulau Pinang

- Pure Science (Biology, Chemistry, Physics).

PROFESSIONAL EXPERIENCE

IT Executive at SummitNext Technologies Sdn Bhd, Sungai Petani, Kedah **Apr 2026 - Present**

- Provide first-level IT support to employees, diagnosing and resolving hardware, software, Windows OS, workstation, and application-related issues to minimize operational disruption.
- Configure, deploy, maintain, and troubleshoot Windows workstations, including software installation, system configuration, performance optimization, and routine maintenance.
- Troubleshoot network connectivity and workstation-related network issues to maintain reliable access to internal systems and business applications.
- Manage IT assets and maintain accurate asset inventory records to support effective tracking, allocation, and lifecycle management of company equipment.
- Coordinate with external vendors for IT equipment repairs, procurement, replacements, and technical services.
- Develop and maintain automation scripts and system configurations to streamline repetitive IT tasks, improve workstation maintenance, and reduce manual intervention.
- Deploy, configure, and troubleshoot remote IT management solutions for monitoring and administering endpoints.
- Investigate technical incidents by identifying root causes, testing solutions, and implementing fixes with minimal disruption to daily operations.
- Support IT projects, system rollouts, and new user onboarding activities, including workstation preparation, software deployment, and system configuration.
- Provide technical guidance to users while following internal IT procedures, security practices, and data protection requirements.

Internship at Northern Asia Resources, Sungai Petani, Kedah **Oct 2025 - Apr 2026**

IT Support

- Reduced user downtime and accelerated workstation readiness by configuring Windows OS environments, installing required software, and resolving technical issues for end users.
- Maintained smooth daily operations across departments by providing hands-on support for Microsoft Office and essential business applications.
- Prevented data loss and system failures by performing routine PC maintenance, including backup, restoration, formatting, and performance checks.
- Restored connectivity and minimized work disruption by diagnosing and troubleshooting basic network and hardware-related issues.
- Enhanced IT infrastructure reliability by assisting with structured cabling installation and termination.
- Strengthened user confidence and service responsiveness by delivering prompt, reliable IT support and resolving day-to-day technical incidents efficiently.

Web Systems Development & Maintenance

- Improved system performance and maintainability by upgrading and modernizing existing government web systems using CodeIgniter.
- Enhanced code quality and scalability by refactoring a legacy PHP codebase into a structured MVC architecture with better readability.
- Delivered a fully functional web application from concept to deployment by designing and developing a new system using CodeIgniter and MySQL.
- Strengthened security and workflow efficiency by implementing backend features such as CRUD operations, role-based access control, and approval workflows.
- Ensured stable production releases by collaborating with team members to test, debug, and deploy systems in a live environment.

PROJECTS

Final Year Project

Mobile App for Mosque Members (Ionic, Angular, Java, PHP)

- Improved community engagement and information accessibility by developing a mobile app with prayer times, reminders, and role-based announcements.
- Overcame framework limitations and expanded functionality by creating custom Java plugins and integrating Google Login authentication.
- Enhanced usability and user satisfaction by working closely with supervisors and end users to refine features and improve UI/UX.

Academic Project

Telegram Prayer Time Bot (Java, Telegram API, Docker)

- Enabled automated prayer time notifications for users by developing and deploying a multilingual Telegram bot with state-based support.
- Achieved reliable cloud deployment and scalability by containerizing the application with Docker and hosting it on an Oracle Cloud server.

SKILLS & STRENGTHS

- **Programming & Web:** Java, PHP, HTML/CSS/JavaScript, SQL
- **Frameworks & Tools:** CodeIgniter, Angular, Ionic, Docker, Microsoft Office
- **Databases:** MySQL | **Version Control:** Git/GitHub | **APIs:** RESTful
- **IT Support & Systems:** Software support and troubleshooting, Windows OS setup, software installation, basic network troubleshooting, CLI usage, end-user support
- **Professional Attributes:** Tech-savvy, fast learner, detail-oriented, adaptable, strong problem-solving skills

ADDITIONAL

Languages

- Malay (native speaker)
- English (proficient writing, basic speaking)
